

MAHESH N. SHINGANE

Frontend Developer | React | TypeScript | Angular

+91 88884 81238 | maheshshingane18@gmail.com | [LinkedIn](#) | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building enterprise-grade web applications using React 18, TypeScript, Angular, and modern JavaScript technologies. Experienced in Micro Frontend architecture, Nx Monorepos, Webpack Module Federation, Redux, TanStack React Query, and CI/CD pipelines. Proven track record in performance optimisation, test-driven development, and frontend modernisation across Workplace Management (IWMS), Enterprise SaaS, and E-Commerce domains.

CORE TECHNICAL SKILLS

Frontend: React 18, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Styled Components

State Management: Redux, React Context API, TanStack React Query, Jotai

Architecture: Micro Frontend, Nx Monorepo, Webpack 5, Module Federation, React Router v6

Testing: Vitest, React Testing Library, Cypress, Karma, Jasmine, TDD

DevOps & Tools: Azure DevOps, Docker, Git, Bitbucket, Jira, GitHub Copilot, Cursor AI

API & Integration: REST APIs, Axios, GraphQL, OpenAPI, Contentful CMS

Monitoring: Azure Application Insights, Split.io Feature Flags

Methodologies: Agile Scrum, Code Reviews, TDD, Performance Optimisation, Accessibility, i18n

PROFESSIONAL EXPERIENCE

Cybage Software Pvt. Ltd., Pune

April 2021 – Present

Software Engineer | 5 Years 2 Months

Space Management MFE — React 18, TypeScript, Micro Frontend, Nx Monorepo, Webpack Module Federation

Domain: Workplace Management (IWMS)

- Built and maintained React 18 and TypeScript Micro Frontend applications using Webpack Module Federation within an Nx Monorepo, enabling independent deployment of frontend modules.
- Implemented server-state management using TanStack React Query and client-state management using Jotai; integrated RESTful APIs via Axios and OpenAPI-generated clients.
- Added Azure Application Insights telemetry and custom business event tracking; implemented feature flagging using Split.io for controlled production rollouts.
- Built drag-and-drop functionality using dnd-kit and PDF export features using jsPDF; implemented internationalisation (i18n) using react-i18next.
- Contributed to reusable component development and maintained Storybook stories for the Evo Design System with accessibility improvements.
- Led migration of the test framework from Jest to Vitest, reducing test execution time from ~20 minutes to 10–12 minutes — a ~45% improvement in CI pipeline efficiency.
- Migrated CI/CD pipelines from Codefresh to Azure DevOps, standardising deployment processes and Docker-based workflows across the team.

iOfficeConnect — Angular, TypeScript, Webpack

Domain: Workplace Management (IWMS)

- Developed and maintained Angular and TypeScript application modules for an enterprise IWMS platform managing spaces, reservations, assets, and employee operations.
- Configured and optimised Webpack build pipelines using DLL builds, code splitting, and template compilation, significantly improving build performance.
- Implemented internationalisation (i18n) support and automated translation validation mechanisms for multi-language deployments.
- Maintained Gulp tasks, hot-reload dev servers, ESLint/Prettier checks, Karma and Jasmine unit tests, Azure Pipelines, and Docker-based deployment workflows.

RGAs – Michaels Wreath Maker — React, Redux, GraphQL, Contentful CMS

Domain: E-Commerce

- Developed React components and responsive user interfaces for an interactive product customisation e-commerce application.
- Managed application state using Redux and React Context API; integrated GraphQL APIs and Contentful CMS for dynamic product content delivery.
- Participated in requirement analysis, sprint planning, estimation, and production support activities within an Agile Scrum team.

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC) 2021
Sunbeam Institute of Technology, Pune

Bachelor of Engineering (B.E.) 2018
SGBAU Amravati University, Maharashtra

PROFESSIONAL HIGHLIGHTS

- 5+ years of Frontend Development experience across enterprise SaaS and E-Commerce products
- React 18 and TypeScript specialist with deep expertise in component architecture and state management
- Hands-on Micro Frontend architecture using Webpack 5 Module Federation and Nx Monorepo
- Delivered ~45% CI efficiency improvement through Jest-to-Vitest migration
- Successfully led Codefresh-to-Azure DevOps CI/CD pipeline migration
- Design Systems contributor —Evo Design System, accessibility improvements
